

SERIAL NUMBER FORMAT

2 LETTERS FOLLOWED BY 7 NUMBERS

ex: FB07060265 represents a dual fuel range manufactured during the sixth week in 2007

FIRST LETTER

- A Accessories
- B Blowers
- C BBQ Carts
- D Dishwashers
- E Electric Modules
- F Ranges
- G Coffee System
- H Hoods
- J Electric Ranges
- K Gas Ranges
- L Integrated Hood Liners
- M Metal Cooktops/Gas & Dual Fuel (i.e.SGM and PGM)
- P Wine Coolers
- R Raised Vents
- S Epicure Cooktops
- T Electric Cooktops – Ceran
- V Wall Ovens
- W Warming Ovens/Drawers

SECOND LETTER

Identifies the revision level of the model. New models start with an **A** and as product enhancements are made the revision level will change. Letters *I* and *O* will not be used.

FIRST NUMBER

Last two digits of the year in which the product was manufactured

- 01 – 2001
- 02 – 2002
- 03 – 2003
- 04 – 1994
- 95 – 1995
- 96 – 1996
- 97 - 1997
- 98 – 1998
- 99 – 1999
- 00 – 2000

2nd and 3rd NUMBERS

01 THROUGH 52 indicates the week of the year that the product was produced

- 01 – week 1
- 02 – week 2
- 03 – week 3
- etc.

The last four numbers are the actual serial number of the product.

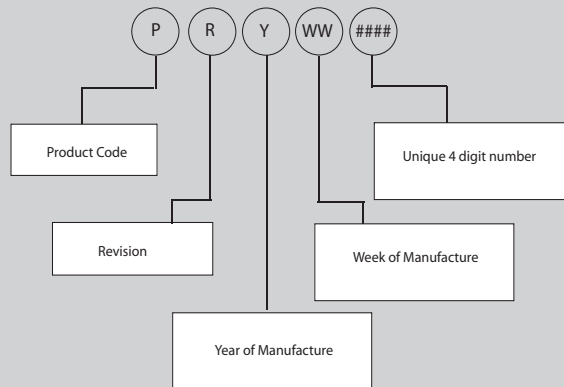

Reading and Understanding Serial Numbers

It is not uncommon to see a reference to a *serial break* in Dacor's documentation. At Dacor we know exactly what that means - but do you know what a reference to a serial break means? Do you know how to tell when the product was made by looking at the serial number? You also need the correct serial number in order to file warranty claims. If you can correctly and accurately read and record the serial number you will know ahead of time whether you'll need additional documentation for the product warranty. Spend a little time checking the serial number before you order the parts and you will save time researching after the claim has been rejected or the part doesn't fit.

Serial Number Format

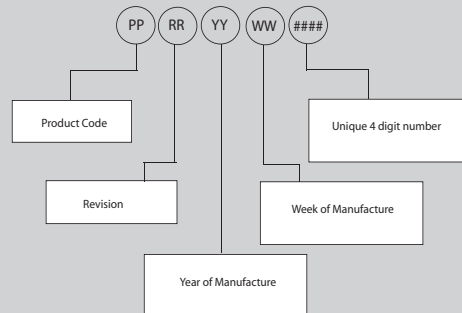

In 2002 Dacor changed the serial number format slightly to accommodate additional product line growth by adding two (2) characters each for product code and revision and two (2) digits for the year of manufacture.

Prior to the 38th week of 2002 the serial number format was:

A dash was added to separate the two codes - so that a serial number ABC representing product type AB at revision C could not be confused as a product type A at revision BC. There is also a dash added between the revision code and year of manufacture. The year code was increased so a unit manufactured in 1992 would not be confused for a unit manufactured in 2002.

The new serial number format will read:

The new serial number format for a PGR30 manufactured at revision F on 9/18/02 with the unique number of 1234 would read: K – F – 02381234. Follow this format when filing warranty claims. The new format was implemented on product manufactured week 38 of 2002.
